- 16 Pump Station (no access)

IMPORTANT CAMPGROUND INFORMATION & GUIDELINES

WELCOME TO COUNTRY

Banana Well Getaway operates a small off grid eco-friendly, bush campground, a quiet escape that allows you to disconnect and take in the simplicity of life. We kindly ask you to respect country when visiting and respect our little getaway and our fabulous team. Please help us to uphold to the following guidelines during your stay at Banana Well Getaway - Please respect your fellow neighbours.

BWG Office hours 7am - 8pm / Quiet time 10pm - 8am

Energy - Power can fluctuate at times and we may sporadically lose power for short periods, however our team once alerted, will quickly rectify. We kindly request that all guest use energy efficiently and turn power off when not in use (lights, fans & air conditioners).

Powered sites - We request that you only use 12-volt appliances, as anything higher can alter the power and cause our system to shut down.

Showers - Please be mindful when using the hot water and limit hot showers to 5 minutes maximum to ensure the next person can enjoy too.

Internet Coverage - Is intermittent. There are hot spots around the camp base.

Leave-no-Trace (Litter) - Due to our isolation and to minimise our landfill, we request guests that are camping and caravanning to collect and take their own rubbish for disposal. If you require rubbish bags - please enquire at reception.

Drunk, disorderly behaviour and illegal use of drugs - Will not be tolerated at our campground and patrons will be evicted and the local Police authority will be notified.

Fishing - Please obtain a day pass for your car dashboard, to access the landing (Burrjuk Creek). Enter at your own risk and take all precautions if launching your boat at the landing. We are not able to facilitate any boat launching at this site and suggest you would need to be very experienced in this area at this site.

Fishing off the bank throughout is accessible. Please check in with our team at the office for their local knowledge and if it is advisable to proceed due to the fluctuation in tidal movements and the weather. Please be aware of the legal limits NB: Fishing licences issued in other states are not valid in WA.

Burrjuk Marshland (mudflats) - Please review tidal movements (tide chart). Do not enter intertidal zones unless you are assured of your safety and the safety of your vehicle. The creek road to the landing can become wet and boggy and vehicles can easily sink into the mud. There is a vehicle recovery charge (no exceptions) however please note, we are not obliged to assist and our staff may not always be capable and other arrangements will have to be made.

Vehicle Washdown area - Please be mindful, this is a washdown facility after you have left the beach and not a full carwash. We do not want to be bringing in the marshland mud to our wash down area.

Wildlife - Be aware wild animals can freely roam on the property so please be mindful and keep an eye out for donkeys, dingos, wild dogs and cattle. Donkeys can be heard during the night.

Crocodiles - Sightings occur in the Burrjuk Creek please be vigilant at all times. Snakes - will come out and about from time to time mainly in the wet season, always be alert and vigilant.

Mosquitoes & sandflies - Mozzies and march flies can inhabit the area during certain times of the year and we suggest wearing protective clothing and repellent. Sandflies are more prevalent during high tides.

Dogs - It is a condition that dogs are to be sociably and farm animal friendly and owners are to take full responsibility of their beloved and to be on a leash at all times. Owners are responsible for the poo patrol of their animal. Please be mindful our resident camp dog Azzy is free roaming. She is friendly and playful and might pay you a visit at your site.

Travelling on the Peninsula? Please discuss with reception areas of interest as many areas on the Dampier Peninsular do not allow access due to being (private property / leases or Aboriginal communities).

THANK YOU FOR CHOOSING TO STAY WITH US
